garden art

all year long!

FlowerTower 6

56" tall , 18" wide at the base

This FlowerTower has six legs, and is handmade of 3/8 inch steel, with aluminum rings that hold the glass ball. It is the original FlowerTower and still one of our best sellers.

The steel has multiple coats of rust preventive paint and a clear acrylic coat. All products are fully guaranteed. All products are usable year round and can be used as a framework for holiday decorations

The Planter Hanger

69" tall, 12 ' wide at base

The Planter Hanger is made of 3/8 inch steel, with a copper sleeve that holds the glass ball. The hanger arm design is fluid and somewhat asymmetrical. Each tower is unique.

This product is perfect for large pots that have a minimum of 12" diameter at the bottom. They can hold bird feeders, lights, globes-basically an endless list of items to enhance your deck, gardens, patios or entry ways.

garden art all year long!

Feeder/hanger Trellis 83" tall, 19" wide at base

The feeder/hanger trellis is made of 3/8 inch steel, with a copper sleeve that holds the glass ball. The steel has multiple coats of rust preventive paint. This item is one of our bestsellers.

The feeder/plant hanger is perfect for creating a mini-habitat, capable of drawing many denizens of the garden. Hang feeders, globe lights and annual plants that can live through the warm months. Plant perennial climbers to start each spring!

Garden Pinnacles 83" tall, 19" base

The Pinnacle is handmade of 3/8 inch steel, with a glass ball on top, and a copper sleeve which is coated with an industry clear protective coat. The steel has multiple coats of rust preventive paint and a clear acrylic finish.

It is tall and slender with elegant proportions, and is ideal for Morning Glories, Mandevilla (climber), Clematis, climbing roses, Tangerine Crossvines, Black-eye Susan vines and other flowers that your climate allows for.

Planting more than one flowering vine on the Pinnacle can result in multiple months of blooming.

The Mason Bee Chalet

60" tall, 6" wide at base

(There is a 14" long spike and foot for securing the chalet into the ground)

Our newest edition and is made of 3/8 inch steel, a PVC house, paper tubes, and a copper sleeve that holds the glass ball.

Mason and Leafcutter bees are solitary cavity-nesting bees, and are fascinating to watch. They are also master pollinators, being 90% more effective than honey bees! They are gentle, non-aggressive and easy to raise. If you find you have no solitary cavity bees present, they are very inexpensive to buy and get started.

We would be very interested in talking with you! We are committed to establishing a reseller community on a slow and steady basis. We are happy to discuss how large an area you may be selling into.

We are open to conversations about how this can work for you, and are always happy to explore mutually profitable ideas.

Retail prices are available on the website. Reseller pricing can be discussed confidentially, but a 40-50% discount is available. Currently we sell direct only within a 75 mile radius.

We create new products continuously, and many products are unique and one of a kind. We are always looking for ideas for new markets in the garden space. For instance, the bee houses were a request from a client.

Our products are handmade functional sculptures. A great deal of aesthetic effort goes into the designs, and our artists and artisans are professionals. We have the capacity to supply our reseller projections.

We have a very active social media campaign. We generally post every day. We will mention you if you permit us. Any leads we generate online in your area will be passed along to you.

Please contact the artist & owner directly -Peter Frantz
